Jabber will then request permission to integrate with the Android phone's native calling, contacts and storage features. If this is acceptable and you wish to continue with Jabber logIn select **GET STARTED**.

Next the Jabber application will display the service discovery login screen. Here you will provided the Jabber username and the domain that will be used for service discovery (example. tuser@testlab.com). To proceed with login select the **CONTINUE** button.

Once service discovery has finished you will be prompted to provide the credentials for Jabber log. Provide a valid Jabber username and password and select **SIGN IN**.
